**Mission Statement:** To support the health and wellness of our members and community, as well as to promote women in chemistry and chemical engineering, through events both on campus and in the Bay Area. We believe that providing these opportunities for socialization, discussion, and support will increase the visibility of women in STEM, make connections with our local community, and encourage women to pursue careers in STEM.

**Goals:**
- To increase diversity of attendees by actively participating at prospective weekends and first year orientations
- Support the health and wellness of our members and community by hosting biweekly coffee hours where students can study or take breaks in a safe environment
- Promote trans and nonbinary people and people of color at Berkeley and in the overall chemistry community

One of the main ways that we fulfill these goals is by having events where we can share experiences and have fun in a safe environment.
